### *U-Net variants, detectors 1+2*

### *Single detectors, run-3 U-Net*

### *Detector ensembles, run-3 U-Net*

### *No detector*

Cross-fitted validation PQ (144 observations)

U-Net variants were tuned over a wider fusion grid, so run 3 with detectors 1+2 reads 0.417 there and 0.418 in the Det 1+2 row.
